

2.11 CARDIAC - NARROW COMPLEX TACHYCARDIA

PROTOCOL (EMT-CRITICAL CARE/PARAMEDIC ONLY):

**2.11 CARDIAC - NARROW
COMPLEX TACHYCARDIA**

NOTES/RULES:

1. Protocol to be used only for tachyarrhythmias with cardiac etiology. Consider other causes such as hemorrhage, fever, or sepsis.
2. Diltiazem and adenosine should not be used in the setting of SVTs resulting from atrial fibrillation or atrial flutter in patients with Wolff-Parkinson-White syndrome.
3. Adenosine will be ineffective in converting SVT's caused by atrial fibrillation or flutter.
